

Our home planet is

We call our layer of protection the

of an

but it protects

blazing, hot

can make our air dirty. We can protect our home by

The more we learn to protect our planet, the happier we'll be!

Just like astronauts need their

The atmosphere is quite thin. If the Earth were the size

the atmosphere would be as thin as its skin. The atmosphere might be small,

in a big way. The atmosphere protects us from the

and gives us the air we breathe. Pollution from

, and

, and more.
